

DFY CUSTOM BUSINESS DASHBOARD

A working one-page dashboard, in her colours.

Not a picture of a dashboard. The actual file: open it in any browser, pick a month, type in this month's numbers, and every total, chart and goal updates.

BUILT FOR

Clementine Loom Knit Patterns

Nora Beckett sells knitting patterns on Etsy and her own list. Brand colours: clementine orange, deep teal and cream. She wanted the numbers she actually checks, on one page, without logging into four apps.

★ Sample built for a fictional client.

WORKING
FILE
INCLUDED

1

file, opens in any browser

5

numbers she tracks, with month-on-month change

6

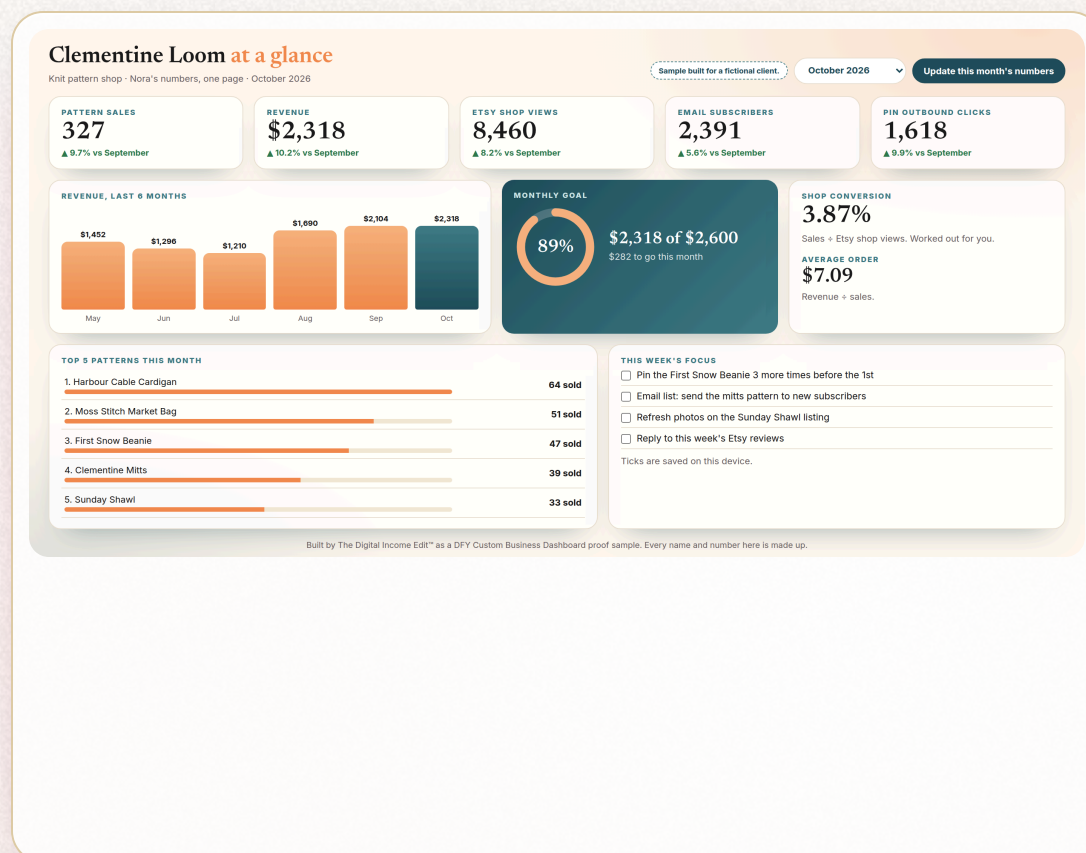

months of history, switchable by month

0

logins, subscriptions or formulas to maintain

WHAT'S ON THE PAGE

Six blocks. Each one answers a question she used to go looking for.

1 Five numbers she checks

Pattern sales, revenue, Etsy shop views, email subscribers and pin outbound clicks, each with its change against last month worked out.

2 Six months of revenue

A bar for each month. This month in her teal, the rest in clementine.

3 Monthly goal ring

She types her goal once. The ring, the percentage and the "to go" line update from her revenue.

4 Conversion and average order

Worked out for her from numbers she already entered. No formulas to maintain.

5 Top 5 patterns

Her best sellers this month with a bar for each, so the winner is obvious.

6 This week's focus

Four tasks she can tick off. Ticks stay put when she comes back.

HOW SHE USES IT

Once a month, **five minutes.**

The dashboard was built around the numbers Nora told us she checks. Updating it takes the time it takes to copy five numbers.

1

Open the file

Double-click it. It opens in her browser, on her laptop or her phone. Nothing to install.

2

Press "Update this month's numbers"

Each number becomes a box. She types in what her Etsy stats, email platform and Pinterest analytics say.

3

Press "Save numbers"

Every change, chart, goal and percentage updates at once, and the numbers are kept on that device for next time.

4

Switch months

The month menu shows any of the six months, with the change against the month before.

TESTED BEFORE HANDOVER

Opened on desktop and phone. Numbers edited and saved, the goal ring and percentages recalculated, the page reloaded to confirm the numbers stayed, and every month switched.

TRY IT YOURSELF

The working file, **DFY-Custom-Business-Dashboard_Sample_Clementine-Loom.html**, comes with this sample. Open it, press "Update this month's numbers", change the revenue, save, and watch the goal ring move. Reload the page and your number is still there.
