THE PART NOBODY TELLS YOU

You found the look. Now what?

You built the storefront. You made the lists. But every single look still comes with four jobs, and tomorrow brings a new look with the same four jobs.

1 The photos

The pieces on their own, styled, and in real life. For every look.

2 The words

A title, a description and alt text that fit each Pin.

3 Where people shop it

A list with the right products, linked the right way.

4 Doing it all again

Same jobs. New look. Every day.

> “Passive income isn’t passive when you’re the one doing every job.

6 Pins a day. By hand?

Two looks a day, three Pins each. Plus the posts and carousels.

11:48 PM, AGAIN.

HERE'S THE SHIFT

Not a guide. An automation you set up once.

The While-You-Sleep Storefront™ is the system behind the looks on my own Lifestyle blog. You set it up once with your taste, your themes and your accounts. Then it works overnight, while you sleep.

One night, the way it's built to run

EXAMPLE NIGHT

☾	11 PM	**You log off.** Computer on, signed into Amazon. Go to bed.
1	OVERNIGHT	**2 looks planned**, each with a Basic, Styled and Lifestyle photo.
2	OVERNIGHT	**6 Pins made**, 3 per look, each linked to its themed Idea List.
3	OVERNIGHT	**A blog post written** for each look, with the finds.
4	OVERNIGHT	**An Instagram carousel made** from the same three photos.
☀	7 AM ON	**It all goes out**, spaced through the day.

✦ **Your taste runs it.** My examples are pink because I am. Yours might be cozy farmhouse, moody florals or full-on sparkle. You set the recipe and the looks follow it.

SHOW, DON'T TELL

One look. Three photos.

REAL LOOK

This is The Pink Ghost Coffee Bar. Every look gets three photos, always in this order: what to buy, how it looks styled, and how it looks in real life.

1 BASIC

See the pieces

A clean shot of only the finds on the list. It's the one photo that gets a headline.

2 STYLED

Feel the style

The same pieces in a real setting, fully styled and never bare. No person, no text.

3 LIFESTYLE

Picture it in your life

My persona, Tommy Kate, using the pieces in her real rooms.

GOOD TO KNOW

These are AI-generated styling photos. Details can differ from the linked products, so the real listing is always the final word.

WHAT ONE LOOK MAKES · PINTEREST + INSTAGRAM

Three Pins. One carousel.

The same three photos go everywhere. Every Pin gets its own title, description and alt text, and links to the themed Amazon Idea List its products came from.

✦ SEE MINE LIVE

The Pink Plaid Pumpkin Patch Outfit

The pumpkin patch was pure mud and I would wear this again tomorrow. A pink plaid shacket over a black square neck crop top, light wash straight leg jeans, white platform sneakers, a purple corduroy tote and the green pom beanie that has basically lived on my head since September.

What you handle. What it handles.

YOU DO, ONCE

- Leave your computer on and signed into Amazon while it works.

IT'S BUILT TO DO, EVERY NIGHT

Run the routine

- Make 3 photos per look: Basic, Styled and Lifestyle.
- Make 6 Pins, each linked to its themed Idea List.
- Write a blog post for each look and make an Instagram carousel.

MADE FOR

Amazon storefront owners who are done posting every single day.

YOUR ACCOUNTS

It runs on your own accounts. Any tool costs are separate.

YOUR CALL

I recommend turning approvals on for your first few days.

REAL TALK

No sales or income promises. What happens after a Pin goes out depends on your taste, your niche and your audience.

It's a website, not a PDF. The full Storefront lives on a site that gets regular updates, so it never goes stale.

YOUR NEXT STEP

Go to bed. Wake up posted.

I built this to run my own storefront. I refuse to gatekeep it. Join the waitlist and you'll get the email the moment it opens.
