

SETUP GUIDE

The While-You-Sleep Storefront™

Your Amazon links, turned into reviewable Pinterest Pin drafts. You choose each Pin and approve scheduling when your connected account supports it.

- ✓ About 5 minutes to start once your accounts are ready
- ✓ Then no building, no selling, no posting drafts are prepared for your review; you choose and approve each schedule
- ✓ Found through search not the feed

xoxo, Jodie

WHAT YOU'RE HOLDING

A workflow that prepares Pins **for your review.**

ChatGPT Work scheduled tasks can prepare reviewable Pin drafts when the feature and connected actions are available in your account. You supply approved product inputs and choose each Pin before scheduling.

**AUTOMATION 1 · THEMED LOOKS**

The weekly workflow organizes your approved product inputs into look drafts, prepares images and Pin copy, and records the result. You review each Pin and approve any scheduling action; destination and publishing steps depend on your connected accounts.

AUTOMATION 2 · OUTFIT OF THE DAY

Optional: for members with the required Brand Closet™ access, the OOTD workflow can prepare new outfit drafts using your own authorized product inputs and images. Account access and each publishing step must be confirmed.

The honest part. Runs depend on the ChatGPT Work mode and connected actions available in your account. Cloud execution may run while your computer is off when supported; local execution requires your computer during a run. Review and approve each Pin before scheduling. Pull or cancellation depends on the publishing connection.

What it doesn't promise: sales. Pinterest is search, and pins get found over weeks and months. This builds and runs the machine. What people buy is up to them and Amazon.

STEP 0 · BEFORE ANYTHING

What you need, up front.

If one of these is missing, the machine doesn't run. Get it first. Full detail is in 01_REQUIREMENTS.txt.

- ✓ A ChatGPT plan with Work and Scheduled Tasks available
Feature availability varies by account and workspace. Confirm Scheduled Tasks and the required connected actions in your own account before setup.
- ✓ A supported execution mode and an available workspace or folder
Use only the connected services and actions the setup confirms are available. Complete sign-in through each service's own sign-in flow.
- ✓ Amazon Associates, plus Influencer approval for Idea Lists
No Influencer approval? The Associates-only path uses a page on your own site, and on most site builders you paste it in yourself.
- ✓ A Pinterest business account and a verified public production board
Use a supported authorized path to resolve and confirm the exact board. If it cannot be verified, do not schedule.
- ✓ Only for the blog half: Chrome signed in to GitHub
With write access to your site's repository.
- ✓ A connected image provider, if you choose that path
Use the provider and model confirmed available in your account. Record commercial-use rights; do not silently switch models or plans.
- ✓ The Brand Closet™ at Rose's \$9/month tier or above
For automation 2 only. It carries the Outfit of the Day.

You don't need a website (unless you choose the Associates-only path or the blog half), Instagram, design skills, code, or your face on camera.

STEPS 1 TO 3

Choose your setup and accounts.

1

CHOOSE A SUPPORTED WORKSPACE

Follow the setup prompt to choose Cloud or Local only if that mode is available in your account. Use the dedicated connected Drive folder or local folder that the setup confirms can store your files. Unzip the kit there if your selected workflow requires it.

2

CONNECT ONLY THE SERVICES YOU CHOOSE

Complete sign-in through Amazon, Pinterest, your selected publisher, image provider, and storage service when prompted. Never type passwords into a task. The setup is incomplete if a required action is unavailable; use a supported manual path where the kit describes one.

3

OPTIONAL: JOIN THE BRAND CLOSET™

Only if you want automation 2. It's Rose's community: free to join, and her paid tiers are \$9/month and \$19/month (her prices). The Outfit of the Day is on her \$9/month tier.

[Join The Brand Closet™](#) and stay signed in to Skool in Chrome.

MADE BY
THE
TASKS,
NOT ME

STEPS 4 AND 5 · THE 5 MINUTES

Paste one prompt. Answer six questions.

4

OPEN A CHATGPT WORK CHAT

Start a new Work chat where the kit is available. Follow the setup prompt to connect the supported storage location and authorize the actions you choose. If Work, Scheduled Tasks, or a required write action is unavailable, stop setup and use only the supported manual path.

5

PASTE THE SETUP PROMPT

Open **02_SETUP_PROMPT.txt**. Copy everything between the two long lines. Paste it into the chat and press Enter. The prompt collects the choices needed for your setup, including:

1. your theme
2. your boards and sections, with public status checked and the exact board assignment verified through a supported path
3. your storefront and your website, if you have one
4. whether you have an AI persona
5. whether you're in The Brand Closet™
6. your time zone, cadence, and Cloud or Local mode if available

Then it writes your files into the folder: **MY_RECIPE.txt**, **storefront-log.md**, **pin-tab.md**, **pin-drafts.md**, **MY_SCHEDULED_TASKS.txt** (plus a pages folder if you paste pages into your site yourself).

My own words, because people ask: it took me 5 minutes to set up. That's with Amazon, Pinterest and my image tools already signed in.

STEPS 6 AND 7 · NEVER SCHEDULED A TASK? START HERE

Hand it the timetable.

6

CREATE YOUR SCHEDULED TASKS

Open **MY_SCHEDULED_TASKS.txt**. It holds the three canonical task prompts: weekly planning, Outfit of the Day when selected, and daily reconciliation.

Configure only tasks supported by your account and setup choices. Each has one line telling you exactly what to type. For each one:

1. In ChatGPT Work, create a Scheduled Task only if the feature is available in your account; follow the current in-app instructions.
2. Type the **name** from the file.
3. Set the **schedule** from the file (for example: weekly, Saturday, 1:05 pm).
4. Give it access to the configured state location only if the task's supported setup requires it.
5. Paste the **prompt**: everything between that task's two long lines.
6. **Save**.

Available menus and actions vary by account. If Scheduled Tasks or a required action is missing, do not claim the automation is active.

7

WATCH THE FIRST RUN

Run a supported task once only after setup and required permissions are confirmed. Review the draft image, product fidelity, title, disclosure, alt text, destination, exact public board and state record. A successful first run does not prove future runs or publishing; monitor the account and report failures.

STEPS 8 TO 10 · LIVING WITH IT

Then you leave it alone.

8

KNOW WHAT YOUR SELECTED MODE REQUIRES

Cloud runs may work while your computer is off when Cloud Work and the required connected actions are enabled for your account. Local runs require your computer and any required local session to be available. Do not assume a missed run will catch up automatically; check the run record and report skipped work.

9

SELECT AND APPROVE EACH PIN

Every Pin starts as a draft for your review. You choose the exact finished Pin and authorize its schedule only after the checks below. A scheduled task cannot infer your choice from a prior look or an older approval.

10

OPTIONAL EXTRAS

09_THE_BLOG_HALF.txt: a shop-the-look section on your own site, written for Google. **05_RECOMMEND_IT_TOO.txt:** a Brand Closet™ card for your pages. **10_INSTAGRAM_ADD_ON.txt:** feed posts (stories are by hand).

BEFORE YOU AUTHORIZE A SCHEDULE

Check the full 2:3 image: every piece is in frame, there are no stray marks or invented details, and the headline is spelled correctly, readable on a phone, and clear of the outfit. Confirm the image shows actual linked items or licensed/customer-owned product photos; otherwise title and describe it as outfit inspiration. Confirm the destination opens, the exact public board and section are verified through a supported path, the required disclosure is present, and title, link, board, disclosure and alt text match. Then select that exact Pin and authorize its schedule. Any later change returns it to review. Mark it scheduled only after publisher confirmation; scheduled does not mean published.

APPROVED VISUAL EXAMPLE · OUTFIT INSPIRATION

A polished pink outfit inspiration Pin.

Approved generated inspiration sample; not a product photo.

WHAT THIS SAMPLE DEMONSTRATES

Composition	Vertical 2:3 flat lay, complete pieces inside the frame, with comfortable margins and a clean headline band.
Headline	“PINK OUTFIT / ideas” is applied after image generation in a consistent serif-and-script layout.
Product fidelity	Generated outfit inspiration only. The sample does not verify or depict linked retail products.
Before scheduling	Confirm the exact image, destination, public board, disclosure, title, alt text, customer selection, and schedule authorization. Any mismatch keeps it in review.
Status	Visual reference only. This sample was not created or scheduled as a live Pin.

OUTFIT OF THE DAY · WORKFLOW EXAMPLE

From lesson to original outfit inspiration.

EXAMPLE IMAGE OMITTED

Build one original, text-free outfit image from authorized product facts. Inspect it against the visual standard, then add the headline.

Generated outfits are inspiration unless verified item imagery is used.

WHAT THE NIGHTLY TASK MUST DO

Find lesson	Read the authorized lesson list and reconcile state before selecting eligible work.
Protect member content	Use lessons only as inspiration. Never copy, save, upload, or publish member-only images, text, or prompts.
Use authorized links	Use the customer's approved product rows and destinations; do not reuse another creator's links or images.
Make original art	Use the configured image provider. Apply the framing and artifact checks in 13_PIN_VISUAL_STANDARD.md.
Review and schedule	The customer selects the exact Pin and authorizes scheduling only after destination, board, disclosure, and metadata checks pass.
Report status	Record only confirmed outcomes. A draft or schedule request is not proof of publication.

WHEN SOMETHING'S OFF

What the tasks do when things go wrong.

PINTEREST LOADS BLANK

If a required page or action is unavailable, stop the run, preserve completed drafts, and report what needs attention. Resume only from recorded state; do not promise an automatic retry or catch-up.

A CONNECTION IS UNAVAILABLE

If a required connected account or action is unavailable, stop the affected work, preserve completed records, and report what needs attention. Never request or enter passwords in a task.

A BOARD WENT SECRET

Verify the exact board through an authorized supported path before scheduling. If public status cannot be verified, schedule nothing.

A RUN WAS MISSED

Check the scheduler and state record. Resume from recorded work, avoid duplicates, and report skipped items. Do not promise automatic recovery until the customer's workflow has demonstrated it.

YOU WANT TO REMOVE A PIN

Use the removal action supported by the selected publisher. If it is already published and the publisher cannot remove it, remove it in Pinterest and record the confirmed result.

AN IMAGE COMES OUT WRONG

Follow the kit's defined image-attempt limit. If framing, required pieces, or product fidelity still fail, drop the look and record why. Add the headline only after the visual acceptance checks pass.

Reports must state what was drafted, approved, scheduled, and verified, and identify any action that still needs you.

WHAT'S NEXT

Add the blog half, or hand it to me.

HAVE THE WEEKEND ECOSYSTEM™?

09_THE_BLOG_HALF.txt adds a shop-the-look section to your site in one paste, with every look page written for Google. My Pinterest block is on my domain only, so your pins can link to your own pages.

Don't have it? The machine runs without a site, straight to your Idea Lists. If you ever want the blog half too, [The Weekend Ecosystem™](#) is \$97 one-time, or 3 × \$33.33.

RECOMMEND THIS KIT

Members of The Digital Income Edit™ earn 40% on every sale they refer, through Beacons' own affiliate feature. The four steps are in 11_WHATS_NEXT.txt.

WANT IT DONE FOR YOU?

The DFY Amazon Storefront Launch is \$297 for 10 themed looks: each an Idea List in your storefront plus 2 pins with your #ad disclosure, built on the same method you're holding.
